
CONSTRUCTION SUPERVISION AND ACCEPTANCE

*Independent quality assurance for planning
and construction of PV systems*

Safeguard your investments. As an experienced partner, meteocontrol represents the interests of investors providing independent advice and quality assurance during the whole construction period, from the planning phase on through the system start-up.

TECHNICAL ADVICE AT PLANNING STAGE

Professional project support and supervision:

- Site evaluation/Yield report
- Project evaluation/Technical Due Diligence
- Advice on technical aspects of EPC and O&M agreements
- Organizing and analyzing component tests

CONSTRUCTION SUPERVISION

Quality assurance by independent experts:

- Technical advice to investors
- Presence on site to assure direct communication between investor and construction manager
- Quality assurance already at construction stage
- Detection and repair of deficiencies before final inspection
- Smooth system start-up

TECHNICAL ACCEPTANCE

Smooth commissioning and start-up of your PV system:

- Examination of project specification
- Check and evaluation of system start-up and manufacturer protocols
- Visual inspection of all components
- Detailed measurements on site
- Checking deficiency repair

Furthermore, meteocontrol provides you with professional and independent support during all phases of your PV project.

- Vendor audits
- Yield reports and Technical Due Diligence
- Quality assurance during system construction
- Technical acceptance and certification
- System monitoring
- Technical operation management
